I will call you this morning about the Rosetta Stone after I drop kiddos off.
Here is an image of T41N R7W Section 6 which contains the mouth of niagara gulch. I think this shows that you do not need consent from anybody to sample niagara gulch. Looks like all sampling sites in the area are more than 300 feet away from the Kruger Claim. They are about 1500 feet away from niagara gulch.

I have a lot of different layers that I can give you to help you with land status. We can also talk on the phone about how I decide who owns what usually. Especially outside of the Rosetta Stone maps.

I am asking Bruce stover if we are allowed to share them.

I will look at land status near niagara tomorrow.
